| Type of Stock Stock Exchange Stock Abbreviation Stock Code Stock Abbreviation before Change | | | | | |
| A Share | Shanghai Stock Exchange | SGSB | 600843 | Shanggong Stock, Gongfeng Share | |
| B Share | Shanghai Stock Exchange | SGBG | 900924 | Gongfeng B Share | |

6. Registration modification information

| Registration date | July 31, 2014 |
|--|---|
| Registration place | Room A-D, 12 th Floor, Orient Mansion, No. 1500, Century Avenue, Pudong New Area, Shanghai |
| License No. | 310000400080303 |
| Tax No. | 310115132210544 |
| Organization Institution Code | 13221054-4 |
| Registration change during report period | The registration of the Company during the report period did not change. |

Chapter 3 Accounting Data and Financial Index Highlights

1. The Company's main accounting data and financial index

(1) Main accounting data

| | | Unit: | Yuan, Currency: RMB |
|---|--|----------------------------------|--|
| Main accounting data | This Report Period (from January to June) | Same period in the previous year | Increase or decrease in this Report Period over the previous year (%) |
| Operating income | 1,039,062,089.09 | 969,890,167.03 | 7.13 |
| Net profit attributed to shareholders | 100,341,086.85 | 41,854,215.80 | 139.74 |
| Net profit attributed to shareholders after non-recurrent account profit/loss | 90,696,688.83 | 41,791,285.85 | 117.02 |
| Net cash flow from operating activities | -8,407,210.31 | -18,746,773.41 | Inapplicable |
| | At the end of this Report Period | At the end of the previous year | Increase or decrease at the end of this Report Period over the previous year (%) |
| Net assets attributed to shareholders | 1,733,510,139.91 | 1,596,085,177.75 | 8.61 |
| Total assets | 3,029,777,641.03 | 2,732,574,497.28 | 10.88 |

(2) Main financial data

| Main financial data | This Report Period (from January to June) | Same period in the previous year | Increase or decrease in this Report Period over the same period in the previous year (%) |
|--|--|----------------------------------|---|
| Basic earnings per share (yuan/share) | 0.1829 | 0.0839 | 118.00 |
| Diluted earnings per share (yuan/share) | 0.1829 | 0.0839 | 118.00 |
| Basic EPS after non-recurrent account profit/loss (yuan/share) | 0.1653 | 0.0838 | 97.26 |
| Weighted rate of return on net assets (%) | 6.0951 | 3.6846 | Increase 2.41 percent |
| Weighted average return on net assets after non-recurrent account profit/loss (%) | 5.5093 | 3.6791 | Increase 1.83 percent |

2. Items and amount of non-recurring profit and loss

Unit: Yuan, Currency: RMB

| | , <u>,</u> |
|---|--------------|
| Items and amount of non-recurring profit and loss | Amount |
| Profits and losses from disposal of non-current assets | 198,286.53 |
| Government subsidies recorded in the current profit and loss | 1,639,575.49 |
| Except effective hedging business relevant to the normal business of the Company, gains and losses from changes in fair value arising from trading financial assets and trading financial liabilities, and investment income from disposal of trading financial assets, trading financial liabilities and available-for-sale financial assets | 2,886,218.55 |
| Other non-operating income and expenditure except the above-said items | 5,686,010.85 |
| Impact on minority interests | -437,512.60 |
| Impact on income tax | -328,180.80 |
| Total | 9,644,398.02 |

Chapter 4 Report by the Board of Directors

1. Discussion and analysis by the Board regarding the operation of the Company during report period

In the first half of 2015, the international economic recovery is slow. The developed economies restarted the industrialization process, and the emerging economies deeply participated in the international industrial layout. The industry is still facing complex international environment. In the domestic, the economy continues the trend of adjustment and differentiation. Downward pressure on economic development continues to increase. Domestic manufacturing overcapacity resolve the slow, the pattern is difficult to change in the short term for more than seeking.

According to the data from China Light Industry Information Center, in the first half of 2015, the comprehensive economic index of China's sewing machinery industry continued to decline compared with last year, and continued to be in the cold region. Affected by the reduced market demand, the sales scale of China's sewing machinery industry was significantly reduced, business efficiency further declined, downward pressure of the industry's development increased. Sewing machinery industry enterprises generally slow down the production rhythm, the major categories of products were in full production cut.

Facing the downturn of the sewing machinery industry and the complex and changeable market environment, the Company's management and all employees work together to actively respond to, adhere to the "leading by science and technology, developing by innovation " business strategy. In the report period, the Company's business situation generally maintained a healthy and stable development. According to the business plan, the Company focused on the following aspects:

1. In abroad, accelerate the integration of oversea subsidiaries, to play a synergistic effect

In order to achieve resource sharing, control risk, and meet the strategic needs of SGE's integration of operation and management, in report period, the company implemented the integration of SGE and its subsidiaries. KSL GmbH was absorbed by PFAFF GmbH, so KSL has become a subsidiary of PFAFF GmbH. It strengthened the research and development of intelligent sewing machine, played a better role of overseas holding and operating platform of SGE. And it also gave full play to its subsidiaries' current advantages, played a synergistic effect, and increased the economic benefit. During the report period, the integration of oversea subsidiaries has achieved initial success.

2. In domestic, vigorously develop China's manufacturing; make sewing machine business stronger and bigger

In domestic, the Company strengthened R&D and innovation of products. The Company reestablished the technical center, to supplement and enhance domestic technology R&D strength and promote the absorption of foreign advanced technology. With the advantages of German high-end technology, the Company occupied a high position of a new round of industry development, and vigorously developed China's manufacturing, promoted industrial restructuring and upgrading. The Company transformed from the low cost competitive advantage to the quality competitive advantage, from extensive manufacturing to environment-friendly and intelligent manufacturing; and from production-oriented manufacturing to service-oriented manufacturing.

In the aspect of household sewing machine, based on "Butterfly" brand, the Company vigorously developed new intelligent products, and further revived old brand through establish and perfect the e-commerce platform of ShangGong Shenbei household multi-functional sewing machine.

3. In the report period, the Company actively expanded the industrial chain, and looked for new profit growth point

Through capital increase of Shensy Company and the relocation and transformation of Ganguang Factory, the Company revived the "Shenbei" business sector, promoted the restructuring from traditional business to e-commerce, modern logistics and modern service industry. The Company's operating income was

increased. It also fostered new profit growth point, reduced operation risk, and enhanced the Company's sustainable development ability.

In the report period, the Company realized the operating income of RMB 1,039.06 million, an increase of 7.13% over the same period of previous year; deducting the influence of EUR/CNY exchange rate fluctuation, the operating income increased by 18.7%; the operating profit amounted to RMB 138.13 million, an increase of 52.54% over the same period of previous year; the net profit attributed to shareholders of listed company amounted to RMB 100.34 million, increased by 139.74%; the net profit attributed to shareholders of listed company after non-recurrent account profit/loss increased 117.02% over the same period of previous year, mainly caused by the initial success of the integration of oversea subsidiaries and the stable operation of domestic enterprises.

1.1 Analysis on main business

1.1.1 Analysis on Change of Relevant Items in Financial Statements

Unit: Yuan, Currency: RMB

| Item | Current period | Previous period | Variable proportion (%) |
|---|------------------|-----------------|-------------------------|
| Operating revenue | 1,039,062,089.09 | 969,890,167.03 | 7.13 |
| Operating expenses | 701,662,230.84 | 661,303,736.20 | 6.10 |
| Sales expenses | 113,957,035.76 | 109,957,980.76 | 3.64 |
| Administration expense | 100,450,384.67 | 102,160,879.18 | -1.67 |
| Financial expenses | 4,949,996.23 | 10,122,179.92 | -51.10 |
| Net cash flow from operating activities | -8,407,210.31 | -18,746,773.41 | 55.15 |
| Net cash flow from investing activities | 145,227,247.78 | -527,878,281.68 | 127.51 |
| Net cash flow from financing activities | -93,121,196.84 | 570,261,489.85 | -116.33 |
| Research and development expenditures | 22,386,716.12 | 28,412,862.30 | -21.21 |

(1) Large change of items in the balance sheet of the Company at the end of Report Period and reasons Unit: Yuan, Currency: RMB

| Item | Balances as at June 30,2015 | Balances as at December 31, 2014 | Increase/decrease | Increase/decrease (%) | Reason |
|-------------------------------------|-----------------------------|-------------------------------------|-------------------|--------------------------|--------|
| Notes receivable | 60,036,967.02 | 5,152,168.94 | 54,884,798.08 | 1065.28 | Note 1 |
| Accounts receivable | 392,952,357.38 | 251,736,145.27 | 141,216,212.11 | 56.10 | Note 2 |
| Dividends receivable | 0.00 | 2,865,327.09 | -2,865,327.09 | -100.00 | Note 3 |
| Available-for-sale financial assets | 178,817,968.70 | 131,031,342.17 | 47,786,626.53 | 36.47 | Note 4 |
| Construction in progress | 31,695,855.31 | 13,702,094.72 | 17,993,760.59 | 131.32 | Note 5 |
| Long-term deferred expense | 124,986.80 | 26,400.00 | 98,586.80 | 373.43 | Note 6 |
| Other current liabilities | 2,741,902.21 | 703,838.61 | 2,038,063.60 | 289.56 | Note 7 |
| Undistributed profits | 293,447,120.77 | 193,106,033.92 | 100,341,086.85 | 51.96 | Note 8 |
| Minority equity | 179,765,413.91 | 40,079,662.83 | 139,685,751.08 | 348.52 | Note 9 |

Note 1: Mainly caused by the incorporation into the scope of consolidation of Shanghai Shensy Enterprise Development Co., Ltd, which increased bank acceptance in the report period.

Note 2: Mainly caused by the incorporation into the scope of consolidation of Shanghai Shensy Enterprise Development Co., Ltd.

Note 3: Caused by receipt of dividends distributed by Shanghai Shensy Enterprise Development Co., Ltd.

Note 4: Mainly caused by the change of fair value of available-for-sale financial assets in the current period.

Note 5: Mainly caused by the incorporation into the scope of consolidation of Shanghai Shensy Enterprise Development Co., Ltd.

Note 6: Mainly caused by subsidiary's Internet brand registration fees increased in the current period.

Note 7: Mainly caused by exhibition fees accrued by subsidiary in the current period.

Note 8: Caused by profits earned in the current period.

Note 9: Mainly caused by the incorporation into the scope of consolidation of Shanghai Shensy Enterprise Development Co., Ltd.

(2) Large change of items in the income statement of the Company in Report Period and reasons

Unit: Yuan, Currency: RMB

上工申贝 (集团)股份有限公司 Shang Gong Group Co., Ltd

| Item | Report period | Same period in the previous year | Increase/decrease | Increase/decrease (%) | Reason |
|--|---------------|-------------------------------------|-------------------|--------------------------|--------|
| Business taxes and surcharges | 3,119,612.56 | 2,360,802.07 | 758,810.49 | 32.14 | Note 1 |
| Financial expenses | 4,949,996.23 | 10,122,179.92 | -5,172,183.69 | -51.10 | Note 2 |
| Losses from asset impairment | -2,815,816.88 | 4,810,987.05 | -7,626,803.93 | -158.53 | Note 3 |
| Gains from changes in fair value | 0.00 | -13,426.44 | 13,426.44 | 100.00 | Note 4 |
| Investment income | 20,386,398.17 | 11,389,745.35 | 8,996,652.82 | 78.99 | Note 5 |
| Non-operating income | 7,858,279.71 | 621,043.73 | 7,237,235.98 | 1,165.33 | Note 6 |
| Income tax expenses | 35,836,814.37 | 25,973,330.78 | 9,863,483.59 | 37.98 | Note 7 |
| Minority interest | 9,471,015.73 | 22,929,651.41 | -13,458,635.68 | -58.70 | Note 8 |
| Net of tax of other comprehensive income | 22,964,056.08 | 10,108,890.80 | 12,855,165.28 | 127.17 | Note 9 |

Note 1: Mainly due to an increase of sales tax, urban construction tax over the same period of previous year.

Note 2: Mainly due to interest expenses decreased over the same period of previous year, and the increase of foreign exchange earnings.

Note 3: Mainly due to the comprehensive factor of the decrease of accounts receivable bad debts provision and the increase of inventory write-down provision over the same period of previous year.

Note 4: Mainly due to the change of fair value of trading financial assets over the same period of previous year.

Note 5: Mainly due to the increase of investment income of financial products with guarantee principal.

Note 6: Mainly due to the comprehensive factor of the receipt of cash allocation caused by bankruptcy reorganization of Shanghai Huayuan Enterprise Development Co., Ltd. and an increase in government subsidies income.

Note 7: Mainly due to the increase of profit earned by European subsidiaries.

Note 8: Mainly due to the equity of DA AG held by SGE increased 29% comparing to the same period of previous year.

Note 9: Mainly due to the comprehensive factor of the increase in changes in fair value of available-for-sale financial assets and decrease in translation of foreign currency statements.

(3) Large change of items in the statement of cash flows of the Company in Report Period and reasons

| | | | | Unit. Tuan, Cui | Ichcy. RMD |
|---|----------------|-------------------------------------|-------------------|--------------------------|------------|
| Item | Report period | Same period in the previous year | Increase/decrease | Increase/decrease (%) | Reason |
| Net cash flows from operating activities | -8,407,210.31 | -18,746,773.41 | 10,339,563.10 | 55.15 | Note 1 |
| Net cash flows from investing activities | 145,227,247.78 | -527,878,281.68 | 673,105,529.46 | 127.51 | Note 2 |
| Net cash flows from financing activities | -93,121,196.84 | 570,261,489.85 | -663,382,686.69 | -116.33 | Note 3 |
| Effect of fluctuation in exchange rate on cash and cash equivalents | -24,238,194.98 | -1,056,688.04 | -23,181,506.94 | -2,193.79 | Note 4 |

Note 1: Mainly caused by the combined effect of an increase in cash received from sales of goods, providing labor and the increase in taxes and fees.

Note 2: Mainly caused by the increase of cash received from due bank RMB structural deposits over the same period of previous year.

Note 3: Mainly caused by the fact that in the same period of previous year, the Company received the funds raised by non-public offering, and cash of dividend distribution and profit payment increase over the same period of previous year.

Note 4: Mainly caused by the change of euro exchange rate.

1.1.2 Others

(1) Detailed description of major changes of profit composition or profit source

In the Report Period, the main business of the Company was stable, and there was no major change in profit structure and profit sources of the Company.

(2) Analysis and description on the earlier-stage implementation progress of various financing and major asset restructuring events of the Company.

The 2013 third temporary general meeting of shareholders held by the Company on August 20, 2013, reviewed and adopted the pre-plan of non-public share offering (A Shares). In February 28, 2014, CSRC examined and approved the non-public share offering of the Company. This offering was completed on March 28, 2014, the actual offering amount was 99,702,823 shares, the offering price was RMB 6.73 yuan/share, the amount of raised funds was RMB 670,999,998.79, and after deduction of offering fees of RMB 32,791,767.81, the net amount of raised funds was RMB 638,208,230.98. After this offering, the total share capital of the Company is 548,589,600 shares, and the lock-up period for the newly increased shares is 12 months. In the Report Period, the lock-up period of these shares expired in the report period. These shares have gone on the market on March 30, 2015. (See Temporary Bulletin No. 2015-007 of the Company for details.)

(3) Statement on progress of operation plan

In this Report Period, the Company actively organized to implement the annual operation plan established by the Board of Directors at the earlier of this year, and the production and operation of Company were healthy and steady. Without consideration of the impact of irregular factors, the operation performance basically met expectations. The investment projects for which funds were raised were under implementation orderly.

1.2 Analysis on operation by industry, products or region

1.2.1 Principal operating activities by industry

Unit: Yuan, Currency: RMB

| Main business by industries | | | | | | | | | | | | |
|--|---|----------------|--|---|---|--------------------|--|--|--|--|--|--|
| Industry | Operating income Operating cost Gross margin(%) income Increase | | Operating income Increase/ decrease (%) | Operating cost Increase/ decrease (%) | Gross margin Increase/ decrease (%) | | | | | | | |
| Sewing equipment | 713,905,928.05 | 416,691,245.42 | 41.63 | -5.84 | -11.78 | Increase 3.93% | | | | | | |

1.2.2 Principal operating activities by regions.

Unit: Yuan, Currency: RMB

| Region | Operating revenue | Increase / decrease of operating income over the previous year (%) | |
|----------|-------------------|---|--|
| Domestic | 520,780,545.21 | 31.12 | |
| Overseas | 589,285,687.70 | -3.38 | |

1.3 Core competitiveness

The Company is the first listed enterprise with the longest history in the domestic sewing equipment industry, and has multiple years of experience in production of sewing equipment. The Company successfully purchased German Dürkopp Adler AG in 2005, one of the famous sewing machine manufacturing companies in the world, which gives the Company the most advanced sewing machine manufacturing technology in the world. In 2013, through cross-border merger and acquisition, the Company successfully controlled German PFAFF AG and German KSL GmbH and its affiliates, both of which were well-established sewing equipment manufacturing enterprises in the same industry, to make its international influence and brand recognition improve largely, and further enhance the core competence of the Company is mainly shown in the following aspects:

I. Technology Advancement Advantage

German KSL GmbH, purchased by the Company, holds the leading position in CNC and robot controlled automatic sewing technologies, and its products are not only applied in the traditional market for sewing machine industry but also applied in some emerging fields, such as automobile, environmental protection,

aeronautics and astronautics and renewable energy, etc. In many fields, such as automobile airbags, filters protecting environment, light carbon fiber structure for plane, etc., the sewing application technology of KSL GmbH has the absolute competition advantage, and especially, it originally created the sewing technology for light carbon fiber and 3D sewing automation. Technologies of KSL GmbH together with technologies of German DA AG and PFAFF AG make the Company own the most advanced sewing technologies in the world.

II. Brand and Product Advantage

Through overseas acquisition, the Company owns some internationally well-known brands, such as "DA" and "PFAFF" with 150 years' history, and "KSL" and "Beisler" with more than 50 years' history, etc., and some famous domestic brands, such as "Butterfly" brand with more than 90 years' history and "Shanggong" brand with more than 50 years' history. These brands have a high recognition and reputation in the sewing machine industry. The products of the Company focus on smart, modularized and highly efficient automatic sewing unit and other sewing equipment with integrated machinery and electronics, covering various advanced technologies in the field of high-end sewing equipment, and the Company holds the leading position in the segmented market of sewing equipment.

III. Technological Research and Development Capability

The Company highly attaches importance to the construction of technological research and development capabilities, which have become the important force driving the development of the Company. The Company has owned a powerful technological research and development team and had the complete and efficient scientific and technological innovation system, the leading sewing machine design plan and the first class assessment method for testing sewing machines in the world. Shanggong technology center domestically is the city level of research and development center in Shanghai, and has the strong digestion and absorption and supporting development capability.

IV. Sales Network throughout the Globe

The products of the Company are widely sold domestically, and the Company has established the relatively perfect marketing channel and service network, and had a great number of valuable and stable high-end clients which manufacture automobile accessories and luxuries.

V. Internationalized Operation and Management Experience

Since 2005, the Company has started to implement strategies of "going out", and after conducting the internationalized operation of the main business, gradually cultured an operation and management team accumulating a great deal of experience in cross-border operation and management.

During the Report Period, the Company continued to promote the integration of global resources of the Company's transnational operations, and further produced the synergistic effect of subsidiaries at home and abroad. The Company's core competitiveness kept on strengthening.

1.4 Investment by the Company

1.4.1 Analysis on the equity investment

| | Unit: 10,00 | 00 Yuan, Currency: RMB |

Statement on Guarantee:

1. In 2005, this Company issued to FAG Kugelfischer GmbH (FAG) a guarantee letter amounting to not more than USD 5,300,000 for house lease of a subsidiary of DA AG in the USA, the subsidiary controlled by ShangGong Europe, with a validity term from June 30, 2005, to October 31, 2015, and meanwhile, on June 30, 2005, ShangGong Europe provided FAG with a cash pledge of EUR 635,000 with the same validity term so as to provide the re-guarantee for transaction of house sales-leaseback between a subsidiary of DA AG in USA and UTF Norcross L.L.C.

2. ShangGong Europe mortgaged 1.2 million shares of DA AG which it held to Commerzbank so that Commerzbank issued to it a bank guarantee letter amounting EUR 5.55 million with a validity term of two years and four months, in order to provide a guarantee for paying the purchase price to the seller who sold equity of Keilmann Sondermaschinenbau GmbH.

3. On March 25, 2014, the Company provided to ShangGong Europe a financing guarantee letter issued by the Shanghai Branch of Commerzbank for applying to Bielefeld Branch of Commerzbank for EUR loans for current funds equivalent to not more than RMB 58 million with one year's validity term.

4. On June 30, 2014, the Company's wholly owned subsidiary, ShangGong (Europe) Holding Co., GmbH, applied to the Bielefeld Branch of the Commerzbank for a current fund loan of EUR8 million, the Shanghai Branch of the Commerzbank issued a financing guarantee letter for the funds, and the Company issued an unconditionally irrecoverable corporate letter of guarantee for payment of EUR8.8 million as counter guarantee for the abovementioned financing guarantee letter.

5. On September 17, 2014, the Company's wholly owned subsidiary, ShangGong (Europe) Holding Co., GmbH, applied to the Bielefeld Branch of the Commerzbank for a short-term credit loan of EUR12 million, the Shanghai Branch of the Commerzbank issued a financing guarantee letter for the funds, and the Company issued an unconditionally irrecoverable corporate letter of guarantee for payment of EUR7.9 million and provided a pledge in cash of RMB50 million as counter guarantee for the abovementioned financing guarantee letter.

3. Basic Information of Company

1.1 Company Profile

Shang Gong Group Co., Ltd., a joint stock limited company with publicly issued A & B shares on the Shanghai Stock Exchange, is the first listed company in the sewing machinery industry of China. The Company was incorporated in April 1994. The registration number of its Business License for Enterprise Legal Persons is 310000400080303. The organizational form of the Company is a joint stock limited company (a Sino-foreign joint venture and a listed company) and the registered capital amounts to RMB 548,589,600.00. The registered address is Room A-D, Floor 12, Orient Mansion, No. 1500 Century Avenue, Pudong New Area, Shanghai and the head office is located in Room A-D, Floor 12, Orient Mansion, No. 1500 Century Avenue, No. 1500 Century Avenue, Pudong New Area, Shanghai. The legal representative is Mr. Zhang Min.

On May 22, 2006, it was decided on the General Meeting on equity division reform by the Company that: the non-tradable equity stockholders pay partially their shares to all the tradable equity shareholders at a ratio of 10 to 6 as consideration of getting tradable rights. After the above consideration of share donation, the total number of shares remains unchanged, but consequently the equity structure has changed. As at December 31, 2013, there were 448,886,777 shares in total.

On February 28, 2014, the China Securities Regulatory Commission approved the non-public offering of A shares of the Company under the Official Reply to the Approval of Non-public Offering of Shares of Shang Gong Group Co., Ltd. ([2014] No. 237). The number of shares issued was 99,702,823.00 and the total number of share capital after the issue was 548,589,600.00. The Company handled equity registration and escrow formalities with the CSDC Shanghai Branch; the corresponding registered capital was changed to RMB 548,589,600.00 and had been verified by the Verification Report (PCPAR [2014] No.111126) issued by BDO China Shu Lun Pan Certified Public Accountants LLP on March 26, 2014.

As at June 30, 2015, the total number of share capital is 548,589,600.00, 100% of which are shares without restrictive conditions for sales.

The Company belongs to special equipment manufacturing industry; main operating activities of the Company are: production and sales of sewing equipment.

The Company's parent company is Shang Gong Group Co., Ltd. and its actual controller is Shanghai Pudong New Area State-owned Assets Supervision and Administration Commission.

3.2 Scope of Consolidated Financial Statements

As of June 30, 2015, subsidiaries within the scope of the consolidated financial statements of the Company are as follows:

| Subsidiaries |
|--|
| 1. Shanghai Shanggong & Butterfly Sewing Machine Co., Ltd. |
| 2. DAP (Shanghai) Co., Ltd. |
| 3. SMPIC IMPORT & EXPORT CO.,LTD. |
| 4. Shanghai SGSB Electronics Co., Ltd. |
| 5. Shanghai SGSB Asset Management Co., Ltd. |

| 7. Dürkopp Adler Sewing Equipment (Suzhou) Co., Ltd. |
| 8. ShangGong (Europe) Holding Corp. GmbH |
| 9. Shanghai Shensy Enterprise Development Co., Ltd |

See "Note 6 Changes in the scope of consolidation" and "Note 7 Equity in other subjects" for details of the scope of consolidated financial statements in the current year and the changes thereof.

4. Preparation Basis of Financial Statements

4.1 Preparation Basis

The Company prepares the financial statements based on going concern, according to the transactions and events actually occurred and in accordance with the Accounting Standards for Business Enterprises - Basic Standard and various specific accounting standards, application guidance and interpretations for accounting standards for business enterprises and other relevant provisions (hereinafter collectively referred to as "Accounting Standards for Business Enterprises") promulgated by the Ministry of Finance and disclosure provisions of the Rules for the Information Disclosure and Compilation of Companies Publicly Issuing Securities No. 15 - General Rules on Financial Reports of the China Securities Regulatory Commission.

4.2 Going Concern

The Company has going-concern ability within 12 months as of the end of the reporting period and has no matters or situations that may lead to serious doubts about the Company's going-concern ability.

5. Principal Accounting Policies and Accounting Estimates

Notes to specific accounting policies and accounting estimates:

The following disclosure has covered the Company's specific accounting policies and accounting estimates prepared according to the actual production and operation characteristics.

5.1 Statement on Compliance with Accounting Standards for Business Enterprises

The financial statements prepared by the Company meet the requirements of the Accounting Standards for Business Enterprises, and truly and completely reflect the Company's financial position, operating results, cash flows and other related information in the reporting period.

5.2 Accounting Period

The accounting year is from January 1 to December 31 in calendar year.

5.3 Operating Cycle

The Company's operating cycle is 12 months.

5.4 Functional currency

The Company adopts RMB as its functional currency.

5.5 Accounting Treatment Methods of Business Combinations under Common Control and not under Common Control

Business combinations under common control: Assets and liabilities acquired from business combinations by the Company are measured at book value of assets and liabilities (including goodwill formed from the purchase of the acquiree by the ultimate controller) in the consolidated financial statements of the ultimate controller. Stock premium in the capital reserve should be adjusted according to the difference between the book value of net asset acquired from the combinations and that of consideration (or total face value of the shares issued) paid. In case the stock premium in the capital reserve is not enough, the retained earnings need to be adjusted.

Business combinations not under common control: Assets paid for consideration and liabilities incurred or borne by the Company on the acquisition date shall be measured at their fair values. The difference between the fair value and the book value should be included in the current profit and loss. The Company shall recognize the difference of the combination costs in excess of the fair value of the identifiable net assets acquired from the acquiree as goodwill. The Company shall include the difference of the combination costs in short of the fair value of the identifiable net assets acquired from the acquiree in the current profit and loss after review.

Intermediary service charges such as audit fee, legal service fee, appraisal and consultancy fee paid for business combinations and other directly relevant expenses are included in the current profit and loss when incurred; the transaction costs for the issuance of equity securities shall be used to offset equities.

5.6 Preparation Methods of Consolidated Financial Statements

5.6.1 Scope of consolidation

The scope of consolidation of the Company's consolidated financial statements is recognized based on the control. All subsidiaries (including the divisible part of the investee controlled by the Company) should be included in the consolidated financial statements.

5.6.2 Consolidation procedure

The Company prepares consolidated financial statements based on its own financial statements and financial statements of its subsidiaries according to other relevant materials. When the Company prepares its consolidated financial statements, it shall regard the whole enterprise group as an accounting entity to reflect the overall financial position, operating results and cash flows of the enterprise group according to the requirements for recognition, measurement and presentation of the relevant Accounting Standards for Business Enterprises and the uniform accounting policies.

Accounting policies and accounting periods adopted by all subsidiaries included in the consolidation scope of the consolidated financial statements should be consistent with those of the Company. If accounting policies and accounting periods adopted by all subsidiaries are inconsistent with those of the Company, in the preparation of the consolidated financial statements, necessary adjustments shall be made according to the accounting policies and accounting periods of the Company. For the subsidiaries acquired through business combination not under common control, adjustments to their financial statements shall be made based on the fair values of net identifiable assets on the acquisition date. For the subsidiaries acquired through business combination not under common control, adjustments to their financial statements shall be made based on the fair values of their assets and liabilities (including goodwill from acquisition of the subsidiaries by the ultimate controller) in the financial statements of the ultimate controller.

The share of owner's equity, net profits and losses in the current year and comprehensive income in the current year of subsidiaries attributable to minority shareholders should separately presented under the item of owner's equity of the Consolidated Balance Sheet, the item of net profit of the Consolidated Income Statement and the item of total comprehensive income. The difference formed by the loss in the current year shared by minority shareholders of the subsidiaries in excess of the share of minority shareholders in the owner's equity at the beginning of the year of the subsidiaries should be used to offset the minority equity.

(1) Increase in subsidiaries or business

In the reporting period, if the Company increased subsidiaries or business from business combinations under common control, then the beginning amount of the Consolidated Balance Sheet should be adjusted; the incomes, expenses and profits from the combinations of the subsidiaries and business from the beginning of the current year to the end of the reporting period shall be included in the Consolidated Income Statement; cash flows from the combinations of the subsidiaries and business from the beginning of the current year to the end of the reporting period shall be included in the Consolidated Cash Flow Statement. At the same time, the Company should adjust the relevant items of the comparative statements and deem that the reporting entity already exists when the ultimate controller starts its control.

Where the Company can control the investee under common control from additional investments, it should deem that parties involved in the combination have make adjustments at the current state when the ultimate controller starts its control. Equity investments held before the Company controls the acquiree, the relevant profit and loss recognized during the period from the later of the date when the Company obtains the original equity and the date when the acquirer and the acquiree are under common control, other comprehensive income and changes in other net assets shall be used to offset the retained earnings at the beginning of the year or the current profit and loss in the period of the comparative statements.

In the reporting period, if the Company increased subsidiaries or business from business combinations not under common control, then the beginning amount of the Consolidated Balance Sheet should not be adjusted; the incomes, expenses and profits from the subsidiaries and business from the acquisition date to the end of the reporting period shall be included in the Consolidated Income Statement; cash flows from the subsidiaries and business from the acquisition date to the end of the reporting period shall be included in the Consolidated Cash Flow Statement.

Where the Company can control the investee not under common control from additional investments, it shall re-measure equity of the acquiree held before the acquisition date at the fair value of such equity on the acquisition date and include the difference of the fair value and book value in the investment income in the current year. Where equity of the acquiree held before the acquisition date involves in other comprehensive income accounted for under equity method and other changes in owner's equity other than net profit and loss, other comprehensive income and profit distribution, the relevant other comprehensive income and other changes in owner's equity shall be transferred to investment income in the current year which the acquisition date falls in, except for other comprehensive income from changes arising from re-measurement of net liabilities or net assets of defined benefit plan.

(2) Disposal of subsidiaries or business

a. General treatment methods

In the reporting period, if the Company disposed subsidiaries or business, then the incomes, expenses and profits from the subsidiaries and business from the beginning of the year to the disposal date shall be included in the Consolidated Income Statement; cash flows from the combinations of the subsidiaries and business from the beginning of the year to the disposal date shall be included in the Consolidated Cash Flow Statement.

When the Company losses the control over the original subsidiary due to disposal of partial equity investments or other reasons, the remaining equity investments after the disposal will be re-measured at the fair value at the date of loss of the control. The difference of total amount of the consideration from disposal of equities plus the fair value of the remaining equities less the shares calculated at the original shareholding ratio in net assets of the original subsidiary which are continuously calculated as of the acquisition date is included in the investment income of the period at the loss of control. Other comprehensive income associated with the original equity investments of the subsidiary and other changes in owner's equity other than net profit and loss, other comprehensive income and profit distribution are transferred into investment income in the current year when the control is lost, except for other comprehensive income from changes arising from re-measurement of net liabilities or net assets of defined benefit plan.

b. Disposal of subsidiary by stages

Where the Company disposes the equity investments in subsidiary through multiple transactions and by stages until it loses the control, if the effect of the disposal on the terms and conditions of all transactions of equity investments in subsidiary and economic effect meet one or more of the following circumstance, it usually indicates that the multiple transactions should be accounted for as a package deal:

i. These transactions are concluded at the same time or under the consideration of mutual effect;

ii. These transactions as a whole can reach a complete business results;

iii. The occurrence of a transaction depends on the occurrence of at least one other transaction;

iV. A single transaction is uneconomical but it is economical when considered together with other transactions.

Where various transactions of disposal of equity investments in subsidiaries until loss of the control belong to a package deal, accounting treatment shall be made by the Company on the transactions as a transaction to dispose subsidiaries and lose the control; however, the difference between each disposal cost and net asset share in the subsidiaries corresponding to each disposal of investments before loss of the control should be recognized as other comprehensive income in the consolidated financial statements and should be transferred into the current profit or loss at the loss of the control.

Where various transactions of disposal of equity investments in subsidiaries until loss of the control do not belong to a package deal, before the loss of the control, accounting treatment shall be made according to the relevant policies for partial disposal of equity investments in the subsidiary without losing control; at the loss of the control, accounting treatment shall be made according to general treatment methods for disposal of subsidiaries.

(3) Purchase of minority interest of subsidiaries

The difference between long-term equity investments newly acquired by the Company through purchase of minority interest and the subsidiary's identifiable net assets attributable to the Company calculated continuously from the acquisition date (or the combination date) in accordance with the newly increased shareholding ratio shall be charged against stock premium within capital reserves in the consolidated balance sheet; when stock premium within capital reserves is insufficient to offset, the retained earnings shall be adjusted.

(4) Partial disposal of equity investments in the subsidiary without losing control

The difference between the proceeds from partial disposal of equity investments in the subsidiary and the share of identifiable net assets of the subsidiary attributable to the Company which are calculated continuously from the acquisition date (or the combination date) and which are corresponding to the disposal of long-term equity investments without losing control shall be charged against stock premium within capital reserves in the consolidated balance sheet; when stock premium within capital reserves is insufficient to offset, the retained earnings shall be adjusted.

5.7 Cash and Cash Equivalents

In preparing the cash flow statement, cash on hand and the unrestricted deposits of the Company are recognized as cash. Short-term (maturing within three months as of the acquisition date) and highly liquid investments held by the Company that are readily convertible to known amounts of cash and which are subject to an insignificant risk of change in value are recognized as cash equivalents.

5.8 Foreign Currency Transactions and Translation of Foreign Currency Statements

5.8.1 Foreign currency transactions

Foreign currency transactions are, on initial recognition, translated to RMB at the spot exchange rates at the dates of the transactions.

The balance of foreign currency monetary items is adjusted and translated into functional currency at balance sheet date using the spot exchange rate. Regarding the year-end differences of translation in foreign currency, except those special borrowing accounts under the acquisition, building or production of assets to be capitalized are capitalized and accounted into related assets cost, all the other differences are accounted into current profits and losses. The foreign currency non-monetary items at historical cost are translated using the spot exchange rate. And the foreign currency non-monetary items at fair value are adjusted and translated into measurement currency at adoption date of fair value using the spot exchange rate. The difference of translation between different currencies is accounted into current profits and losses or capital reserves.

5.8.2 Translation of foreign currency statements

The assets and liabilities of foreign operation are translated to RMB at the spot exchange rate at the balance sheet date. The equity items, excluding "Retained earning", are translated to RMB at the spot exchange rates at the transaction dates. The income and expenses of foreign operation are translated to RMB at the spot exchange rates or the rates that approximate the spot exchange rates at the transaction dates. The resulting exchange differences are recognized in a separate component of equity.

Upon entire/partial disposal of a foreign operation, the entire/partial cumulative amount of the exchange differences recognized in equity which relates to that foreign operation is transferred to profit or loss in the period in which the disposal occurs.

5.9 Financial Instruments

Financial instruments include financial assets, financial liabilities and equity instruments.

5.9.1 Classification of financial instruments

At the initial recognition, financial assets and financial liabilities are classified as: financial assets or financial liabilities measured at fair value through current profit and loss, including financial assets or financial liabilities held for trading, and financial assets or financial liabilities that are directly to be measured at fair value through current profit and loss, held-to-maturity investments, accounts receivable, available-for-sale financial assets and other financial liabilities, etc.

5.9.2 Recognition basis and measurement method of financial instruments

(1) Financial assets (financial liabilities) measured at fair value through current profit and loss

Financial assets (financial liabilities) are initially recorded at fair values when acquired (deducting cash dividends that have been declared but not distributed and bond interest that has matured but not been drawn). Relevant transaction expenses are included in the current profit and loss.

The interest or cash dividends to be received during the holding period is or are recognized as investment income. Change in fair values is included in the current profit and loss at the end of the period.

Upon the disposal, difference between the fair value and the initial book-entry value is recognized as investment income; meanwhile, adjustment is made to gains or losses from changes in fair values.

(2) Held-to-maturity investments

Held-to-maturity investments are initially recorded at the sum of fair values (less the bond interest that has matured but not been drawn) and relevant transaction expenses when acquired.

During the period of holding the investment, the interest income is calculated and recognized according to the amortized costs and effective interest rate, and included in the investment income. The effective interest rates are determined upon acquisition and remain unchanged during the expected remaining period, or a shorter period if applicable.

Difference between the proceeds and the book value of the investment is recognized as investment income upon disposal.

(3) Receivables

For creditor's rights receivable arising from external sales of goods or rendering of service by the Company and creditor's rights of other enterprises (excluding creditor's right quoted in the active market) held by the Company, including accounts receivable, other receivables, the initial recognition amount shall be the contract price or agreement price receivable from the purchasing party; for those with financing nature, they are initially recognized at their present values.

The difference between the amount received and the book value of accounts receivable is included in the current profit and loss upon the recovery or disposal.

(4) Available-for-sale financial assets

Available-for-sale financial assets are initially recorded at the sum of fair values (deducting cash dividends that have been declared but not distributed and bond interest that have matured but not been drawn) and relevant transaction costs when acquired.

The interest or cash dividends to be received during the holding period is or are recognized as investment income. Available-for-sale financial assets are measured at fair value at the end of the year and the changes in fair value are included in other comprehensive income. However, equity instrument investments that have no quoted price in the active market and of which fair values cannot be measured reliably and derivative financial assets that relate to such equity instruments and that shall be settled through the delivery of such equity instruments shall be measured at cost.

Difference between the proceeds and the book value of the financial assets is recognized as investment income upon disposal; meanwhile, amount of disposal corresponding to the accumulated change in fair value which is originally and directly included in other comprehensive income shall be transferred out and recognized as the current profit and loss.

(5) Other financial liabilities

Other financial liabilities are initially recognized at fair values plus related transaction costs. The subsequent measurement is based on amortized costs.

5.9.3 Recognition and measurement of transfer of financial assets

Upon occurrence of transfer of a financial asset, the Company shall de-recognize the transfer of the financial asset if nearly all the risks and rewards associated with the ownership of the financial assets have been transferred to the transferee; and shall not de-recognize the transfer of the financial asset if nearly all the risks and rewards associated with the ownership of the financial asset if nearly all the risks and rewards associated with the ownership of the financial asset if nearly all the risks and rewards associated with the ownership of the financial asset if nearly all the risks and rewards associated with the ownership of the financial asset if nearly all the risks and rewards associated with the ownership of the financial assets are retained.

The principle of substance over form is adopted to determine whether a financial asset meets the above de-recognition conditions for the financial asset. The transfer of a financial asset of the Company is classified into the entire transfer and the partial transfer of financial asset. If the entire transfer of financial asset satisfies the criteria for de-recognition, the difference between the amounts of the following two items shall be included in the current profit and loss:

(1) The book value of the transferred financial asset;

(2) The sum of the consideration received from the transfer and the accumulated amount of the changes in fair value originally and directly included in shareholders' equity (the situation where the financial asset transferred is an available-for-sale financial asset is involved in).

If the partial transfer of financial asset satisfies the criteria for de-recognition, the entire book value of the transferred financial asset shall be split into the derecognized part and recognized part according to their respective fair value and the difference between the amounts of the following two items shall be included in the current profit and loss:

(1) The book value of derecognized part;

(2) The sum of the consideration for the derecognized part and the portion of de-recognition corresponding to the accumulated amount of the changes in fair value originally and directly included in owners' equity (the situation where the financial asset transferred is an available-for-sale financial asset is involved in).

If the transfer of financial assets does not meet the de-recognition criteria, the financial assets shall continue to be recognized and the consideration received will be recognized as a financial liability.

5.9.4 Derecognition criteria of financial liabilities

A financial liability shall be wholly or partly derecognized if its present obligations are wholly or partly dissolved. Where the Company enters into an agreement with a creditor so as to substitute the existing financial liabilities with any new financial liability, and the new financial liability is substantially different from the contractual stipulations regarding the existing financial liability, it shall derecognize the existing financial liability, and shall at the same time recognize new financial liability.

Where substantial revisions are made to some or all of the contractual stipulations of the existing financial liability, the Company shall derecognize the existing financial liability wholly or partly, and at the same time recognize the financial liability with revised contractual stipulations as a new financial liability.

Upon whole or partial derecognition of financial liabilities, the difference between the book value of the financial liabilities derecognized and the consideration paid (including non-cash assets surrendered or new financial liabilities assumed) shall be included in the current profit and loss.

Where the Company redeems part of its financial liabilities, it shall, on the redemption date, allocate the entire book value of financial liabilities according to the comparative fair value of the part that continues to be recognized and de-recognized part. The difference between the book value allocated to the derecognized

part and the considerations paid (including non-cash assets surrendered and the new financial liabilities assumed) shall be included in the current profit and loss.

5.9.5 Determination method of fair value of financial assets and financial liabilities

Where there is an active market for financial instruments, the fair values shall be determined according to quoted prices in active markets. Where there is no active market, the fair values shall be determined using reasonable valuation techniques. At the time of valuation, the Company adopted valuation techniques applicable in the current situation and supported by enough available data and other information, select input values consistent with the features of assets or liabilities considered by market participants in the transaction related to the assets or liabilities, and give priority to using the relevant observable input values. Only when it is unable or impracticable to obtain the relevant observable input values, unobservable input values can be used.

5.9.6 Test method and accounting treatment of depreciation of financial assets (excluding receivables) Except for the financial assets measured at fair values through current profit and loss, the book value of financial assets on the balance sheet date should be checked. If there is objective evidence that a financial asset is impaired, provision for impairment shall be made.

(1) Provision for impairment of available-for-sale financial assets:

If the fair value of available-for-sale financial assets has significantly declined at the end of the period, or it is expected that the trend of decrease in value is non-temporary after considering of various relevant factors, the impairment shall be recognized, and accumulated losses from decreases in fair value originally and directly included in owners' equity shall be all transferred out and recognized as impairment loss.

For available-for-sale debt instruments whose impairment losses have been recognized, if their fair values rise in the subsequent accounting period and such rise is objectively related to the matters occurring after the recognition of impairment loss, the previously recognized impairment loss shall be reversed and recorded into the current profit and loss.

Impairment losses on available-for-sale equity instruments should not be reversed through profit and loss.

Criteria of the Company for "serious" decline of fair value of investments in available-for-sale equity instruments: In general, for highly liquid equity investments that are actively traded in the market, over 50% of the decline is considered to be a serious fall. Criteria for "non-temporary" decline of fair value: In general, if a continuous decline lasts for more than six months, it is considered as "non-temporary decline." (2) Provision for impairment of held-to-maturity investments:

Measurement of provision for impairment loss on held-to-maturity investments is treated in accordance with the measurement method of impairment loss on accounts receivable.

5.10 Provision for bad debts of receivables

5.10.1 Receivables that are individually significant but with provision for bad debts made on an individual basis:

| Assessment basis or standard of amount individually significant | Top five biggest balance accounts |
|--|---|
| Method of provision for bad debts of receivables that are individually significant | An impairment test shall be separately made and provision for bad debts shall be made according to the difference between the present value of estimated future cash flows lower than the book value and should be included in the current profit and loss. For short-term receivables, the difference between expected future cash flows and the present value is too small to discount the expected future cash flows when recognizing the relevant impairment losses. |

5.10.2 Provision for bad debts of receivables made on credit risk characteristics portfolio basis:

| Methods of provision for bad debts made on credit risk characteristics portfolio basis | | | | |
|--|--|--|--|--|
| Portfolio | Balances of receivables other than accounts receivable subject to provisions for bad debts on an | | | |
| FOLIOIIO | individual basis and other receivables | | | |
| | Methods of provision for bad debts made on the basis of portfolio | | | |
| Portfolio | Aging analysis method | | | |

| Aging | Proportion of provision for accounts receivable (%) | Proportion of provision for other receivables (%) | |
|----------------------------------|--|--|--|
| Within 1 year (including 1 year) | 5 | 5 | |
| 1 to 2 years | 20 | 20 | |
| 2 to 3 years | 50 | 50 | |
| Over 3 years | 100 | 100 | |

Provision for bad debts made at aging analysis method in the portfolio:

5.10.3 Receivables that are individually insignificant but with provision for bad debts made on an individual basis:

Reason for bad debt provision provided on an individual basis: Receivables of a particular object.

Method of provision for bad debts: An impairment test should be separately made. When there is objective evidence suggesting that receivables are impaired, provision for bad debts shall be made at the difference of present value of estimated future cash flows in short of their book values and should be included in the current profit and loss.

5.11 Inventories

5.11.1 Classification of inventories

Inventories are classified into Materials in transit, raw materials, revolving materials, stock commodities, goods in progress, dispatched goods, consigned processing materials and others.

5.11.2 Measurement method of dispatched inventories

Inventories are measured with weighted average method when dispatched.

5.11.3 Recognition basis for net realizable values of inventories of different categories

In normal operation process, for merchandise inventories for direct sale, including finished goods, stock commodities and materials for sale, their net realizable values are determined at the estimated selling prices minus the estimated selling expenses and relevant taxes and surcharges; in normal operation process, for material inventories that need further processing, their net realizable values are determined at the estimated selling expenses and relevant taxes to completion, estimated selling expenses and relevant taxes and surcharges; for inventories held to execute sales contract or service contract, their net realizable values are calculated on the basis of contract price. If the quantities of inventories specified in sales contracts are less than the quantities held by the Company, the net realizable value of the excess portion of inventories shall be based on general selling prices.

At the end of the period, provisions for inventory depreciation reserve are made on an individual basis. For inventories with large quantity and low unit price, the provisions for inventory depreciation reserve are made on a category basis. For inventories related to the product portfolios manufactured and sold in the same area, and of which the final usage or purpose is identical or similar thereto, and which is difficult to separate from other items for measurement purposes, the provisions for inventory depreciation reserve shall be made on a portfolio basis.

Except that there is clear evidence that the market price is abnormal on the balance sheet date, the net realizable value of inventory items shall be recognized at the market price on the balance sheet date.

Net realizable value of inventory items at the end of the year is recognized at the market price on the balance sheet date.

5.11.4 Inventory system Perpetual inventory system is adopted.

5.11.5 Amortization method of low-cost consumables and packaging materials

- (1) one-off amortization method is adopted for low-cost consumables;
- (2) one-off amortization method is adopted for packaging materials.

5.12 Long-term Equity Investments

5.12.1 Criteria for judgment of common control and significant influence

The term 'common control' refers to the joint control, according to the relevant provisions, over an arrangement, of which the relevant activities should be agreed and decided by the participants that share the control. Where the Company and other investors exert common joint control over the investee and the Company is entitled to net assets of the investee, the investee is the joint venture of the Company.

Significant influence refers to the power to participate in making decisions on the financial and operating policies of an enterprise, but not the power to control, or jointly control, the formulation of such policies with other parties. Where the Company is able to exert significant influence over the investee, the investee is its associate.

5.12.2 Recognition of initial investment costs

(1) Long-term equity investments acquired from business combination

Business combination under common control: if the Company makes payment in cash, transfers non-cash assets or bears debts and issues equity securities as the consideration for the business combination, the book value of the owner's equity of the acquiree in the consolidated financial statements of the ultimate controller is recognized as the initial cost of the long-term equity investment on the combination date. In case the Company can exercise control over the investee under common control for additional investment or other reasons, the initial investment cost of long-term equity investments is recognized at the share of book value of net asset of the acquiree after the combination in the consolidated financial statements of the ultimate controller on the combination date. The stock premium should be adjusted at the difference between the initial investment cost of long-term equity investments on the combination date and the book value of long-term equity investments on the combination paid for additional shares; if there is no sufficient stock premium for write-downs, the retained earnings are adjusted.

Business combination not under common control: The Company recognizes the combination cost determined on the combination date as the initial cost of long-term equity investments. Where the Company can exercise control over the investee not under common control for additional investments or other reasons, the initial investment cost changed to be accounted for under the cost method should be recognized at the book value of originally held equity investments plus costs of additional investments.

(2) Long-term equity investment acquired by other means

For a long-term equity investment acquired through making payments in cash, its initial cost is the actually paid purchase cost.

For a long-term equity investment acquired from issuance of equity securities, its initial cost is the fair value of the issued equity securities.

If the exchange of non-monetary assets has commercial substance and the fair values of assets traded out and traded in can be measured reliably, the initial cost of long-term equity investment traded in with non-monetary assets are determined based on the fair values of the assets traded out and the relevant taxes and surcharges payable unless there is any conclusive evidence that the fair values of the assets traded in are more reliable; if the exchange of non-monetary assets does not meet the above criteria, the book value of the assets traded out and the relevant taxes and surcharges payable are recognized as the initial cost of long-term equity investment traded in.

For a long-term equity investment acquired from debt restructuring, its initial cost is determined based on the fair value.

5.12.3 Subsequent measurement and recognition of gains and losses

(1) Long-term equity investment accounted for under the cost method

Long-term equity investments in subsidiaries are accounted for under the cost method. Except for the actual price paid for acquisition of investment or the cash dividends or profits contained in the consideration

which have been declared but not yet distributed, the Company recognizes the investment income in the current year at the cash dividends or profits declared by the investee.

(2) Long-term equity investments accounted for under the equity method

Long-term equity investments in associates and joint ventures are accounted for under the equity method. If the cost of initial investment is in excess of the proportion of the fair value of the net identifiable assets in the investee when the investment is made, the difference will not be adjusted to the initial cost of the long-term equity investments; if the cost of initial investment is in short of the proportion of the fair value of the net identifiable assets in the investee when the investment is made, the difference will be included in the current profit and loss.

The Company shall recognize the investment income and other comprehensive income at the shares of net profit and loss and other comprehensive income realized by the investee which the Company shall enjoy or bear and adjust the book value of long-term equity investments at the same time; the Company shall calculate the shares according to profits or cash dividends declared by the investee and correspondingly reduce the book value of long-term equity investments; the book value of long-term equity investments; the book value of long-term equity investments; the book value of long-term equity investments shall be adjusted according to the investee's other changes in owner's equity other than net profit and loss, other comprehensive income and profit distribution, which should be included in owner's equity.

The share of the investee's net profit or loss should be recognized after adjustments are made to net profit of the investee based on the fair value of identifiable net assets of the investee upon acquisition of investments and according to accounting policies and accounting period of the Company. When holding the investment, the investee should prepare the consolidated financial statements, it shall account for the investment income based on the net profit, other comprehensive income and the changes in other owner's equity attributable to the investee.

When the Company recognizes its share of loss incurred to the investee, treatment shall be done in following sequence: firstly, the book value of the long-term equity investment shall be reduced. Secondly, where the book value thereof is insufficient to cover the share of losses, investment losses are recognized to the extent of book value of other long-term equities which form net investment in the investee in substance and the book value of long term receivables shall be reduced. Finally, after all the above treatments, if the Company is still responsible for any additional liability in accordance with the provisions stipulated in the investment contracts or agreements, provisions are recognized and included into current investment loss according to the obligations estimated to undertake.

(3) Disposal of long-term equity investments

For disposal of long-term equity investment, the difference between its book value and the actual price shall be included in the current profit and loss.

For long-term equity investments accounted for under the equity method, when the Company disposes such investments, accounting treatment should be made to the part that is originally included in other comprehensive income according to the corresponding proportion by using the same basis for the investee to directly dispose the relevant assets or liabilities. Owner's equity recognized at the changes in the investee's other owner's equity other than net profit or loss, other comprehensive income and profit distribution shall be transferred to the current profit and loss according to the proportion, except for other comprehensive income from changes arising from re-measurement of net liabilities or net assets of defined benefit plan.

In case the joint control or significant influence over the investee is lost for disposing part of equity investments or other reasons, the remaining equity will be changed to be accounted for according to the recognition and measurement principles of financial instruments. The difference between the fair value and the book value on the date of the loss of joint control or significant influence should be included in the current profit and loss. For other comprehensive income recognized from accounting of the original equity investments under the equity method, accounting treatment should be made by using the same basis for the investee to directly dispose the relevant assets or liabilities when the equity method is no longer adopted. Owner's equity recognized from the investee's changes in other owner's equity other than net profit or loss,

other comprehensive income and profit distribution should all transferred to the current profit and loss when the equity method confirmed is no longer adopted.

In case the control over the investee is lost for disposing part of equity investments or other reasons, when the Company prepares the individual financial statements, where the remaining equity after the disposal can exercise joint control or significant effect on the investee, then such equity will be changed to be accounted for under the equity method and the remaining equity is deemed to have been adjusted under the equity method on acquisition; where the remaining equity after the disposal cannot exercise joint control or significant effect on the investee, then accounting treatment shall be changed to be made according to the relevant provisions on the recognition and measurement principles of financial instruments. The difference between the fair value and the book value on the date of the loss of joint control or significant influence should be included in the current profit and loss.

In case the disposed equity is acquired from additional investments or other reasons, when the Company prepares the individual financial statements, where the remaining equity after the disposal is accounted for under the cost method or the equity method, other comprehensive income and other owner's equity recognized from the accounting of equity investments held before the acquisition date under the equity method shall be transferred according to the proportion; where accounting treatment of the remaining equity after the disposal is changed to be made according to the recognition and measurement principles of financial instruments, all of other comprehensive income and other owner's equity shall be transferred.

5.13 Investment Property

Investment properties are properties to earn rentals or for capital appreciation or both. Examples include land leased out under operating leases, land held for long-term capital appreciation, buildings leased out under operating leases, (including buildings that have been constructed or developed for future lease out under operating leases, and buildings that are being constructed or developed for future lease out under operating leases).

The Company adopts the cost model to measure all current investment properties. The Company adopts the same depreciation policy for the investment property measured at cost model - building for renting as that for the Company's fixed assets and the same amortization policy of land use right for renting as that for the Company's intangible assets.

5.14 Fixed assets

5.14.1 Recognition criteria for fixed assets

Fixed assets refer to tangible assets held for the purpose of producing commodities, providing services, renting or business management with useful lives exceeding one accounting year. Fixed assets will only be recognized when all the following criteria are satisfied:

(1) It is probable that the economic benefits relating to the fixed assets will flow into the Company; and (2) the costs of the fixed asset can be measured reliably.

5.14.2 Depreciation method

Depreciation of fixed assets is provided on a category basis using the straight-line method. The depreciation rates are determined according to the categories, estimated useful lives and estimated net residual rates of fixed assets. If the components of a fixed asset have different useful lives or cause economic benefit for the Company in different ways, different depreciation rate or method shall be adopted for depreciation on an individual component basis.

| Category | Depreciation life (years) | Residual rate (%) | Annual depreciation rate (%) |
|-----------------------------|---------------------------|-------------------|------------------------------|
| Buildings and constructions | 5-50 | 0-10 | 1.8-20 |
| Machinery equipment | 5-15 | 0-10 | 6-20 |
| Transportation equipment | 3-14 | 0-10 | 6.43-33.33 |
| Electronic equipment | 3-14 | 0-10 | 6.43-33.33 |
| Renovations of fixed assets | 5-15 | 0 | 6.67-20 |

Depreciation of fixed assets, depreciation period, residual rate and annual depreciation rates are as follows:

上工申贝 (集团)股份有限公司 Shang Gong Group Co., Ltd

| Other equipment | 3-14 | 0-10 | 6.43-33.33 |
|------------------|------|------|------------|
| Saidi equipinent | e 11 | 0 10 | 0112 22122 |

5.15 Construction in progress

The book values of the construction in progress are stated at total expenditures incurred before reaching working condition for their intended use. For construction in progress that has reached working condition for intended use but relevant budgets for the completion of projects have not been completed, the estimated values of project budgets, prices, or actual costs should be included in the costs of relevant fixed assets, and depreciation should be provided according to relevant policies of the Company when working condition is reached. After the completion of budgets needed for the completion of projects, the estimated values should be substituted by actual costs, but depreciation already provided is not adjusted.

5.16 Borrowing costs

5.16.1 Recognition criteria for capitalization of borrowing costs

Borrowing costs include the interest on borrowings, the amortization of discount or premium, auxiliary expenses, exchange differences incurred by foreign currency borrowings, etc.

The borrowing costs incurred to the Company and directly attributable to the acquisition and construction or production of assets eligible for capitalization should be capitalized and recorded into asset costs; other borrowing costs should be recognized as costs according to the amount incurred and be included into current profit and loss.

Assets eligible for capitalization refer to fixed assets, investment property, inventories and other assets which may reach their intended use or sale status only after long-time acquisition and construction or production activities.

Borrowing costs may be capitalized only when all the following conditions are met at the same time: (1) the asset disbursements have already incurred, which shall include the cash paid, non-cash assets transferred or interest bearing debts undertaken for the acquisition and construction or production activities for preparing assets eligible for capitalization;

(2) the borrowing costs has already incurred; and

(3) Purchase, construction or manufacturing activities that are necessary to prepare the asset for its intended use or sale have already started.

5.16.2 Capitalization period of borrowing costs

Capitalization period refers to the period from commencement of capitalization of borrowing costs to its cessation; period of suspension for capitalization is excluded.

When the qualified asset under acquisition and construction or production is ready for the intended use or sale, the capitalization of the borrowing costs shall be ceased.

When some projects among the acquired and constructed or produced assets eligible for capitalization are completed and can be used separately, the capitalization of borrowing costs of such projects should be ceased.

Where construction for each part of assets purchased, constructed or manufactured has been completed separately but can be used or sold only after the entire assets have been completed, capitalization of attributable borrowing costs should cease at the completion of the entire assets.

5.16.3 Period of capitalization suspension

If the acquisition and construction or production activities of assets eligible for capitalization are interrupted abnormally and this condition lasts for more than three months, the capitalization of borrowing costs should be suspended; if the interruption is necessary for the acquisition and construction or production to prepare the assets for their intended use or sale, the capitalization of borrowing costs should

continue. The borrowing costs incurred during interruption are recognized in the current profit and loss, and the capitalization of borrowing costs continues after the restart of the acquisition and construction or production activities of the assets.

5.16.4 Capitalization rate and measurement of capitalized amounts of borrowing costs

As for special borrowings borrowed for acquiring and constructing or producing assets eligible for capitalization, the to-be-capitalized amount shall be determined at interest expense of special borrowing actually incurred in the current period less the interest income of the borrowings unused and deposited in bank or return on temporary investment.

As for general borrowings used for acquiring and constructing or producing assets eligible for capitalization, the to-be-capitalized amount should be calculated by multiplying the weighted average of asset disbursements of the part of accumulated asset disbursements exceeding special borrowings by the capitalization rate of used general borrowings. The capitalization rate is calculated by using the weighted average interest rate of general borrowings.

5.17 Intangible Assets

5.17.1 Measurement of intangible assets

(1) The Company initially measures intangible assets at cost on acquisition; The costs of external purchase of intangible assets comprise their purchase prices, related taxes and surcharges and any other directly attributable expenditure incurred to prepare the asset for its intended use. If payments for the purchase of intangible assets are extended beyond the normal credit terms with financing nature, the costs of intangible assets are determined on the basis of present values of the purchase prices.

For intangible assets obtained from debtors in settlement of his liabilities in case of debt restructuring, they should be initially stated at their fair values. Differences between the book values and the fair values of the intangible assets are charged to profit or loss for the current period.

If the exchange of non-monetary assets has commercial substance, and the fair values of these assets can be measured reliably, the book-entry values of intangible assets traded in are based on the fair values of the intangible assets traded out unless there is any conclusive evidence that the fair values of the assets traded in are more reliable. If the exchange of non-monetary assets does not meet the above criteria, the costs of the intangible assets traded in should be the book values of the assets traded out and relevant taxes and surcharges paid, and no profit or loss shall be recognized.

(2) Subsequent measurement

The useful lives of the intangible assets are analyzed and determined on their acquisition.

As for intangible assets with limited useful life, straight-line amortization method is adopted in the period when the intangible assets generate economic benefit for enterprise; if the period when the intangible assets generate economic benefit for enterprise cannot be forecasted, the intangible assets shall be deemed as those with indefinite useful life and shall not be amortized.

| 5.17.2 Estimate of the useful life of the Intangible assets with finite useful lives: | | | | | |
|---|------------|--|--|--|--|
| Item Estimated useful lives | | | | | |
| Land use right | 50 years | | | | |
| Right to use trade mark | 10 years | | | | |
| Patent and non-patent technology | 4-8 years | | | | |
| Computer software | 3-10 years | | | | |

5.17.2 Estimate of the useful life of the Intangible assets with finite useful lives:

The useful lives and amortization methods of intangible assets with limited useful lives are reviewed at each period end.

Upon review, the useful lives and amortization method of the intangible assets as at the end of this period were not different from those estimated before.

5.18 Impairment of Long-term Assets

The Company will conduct the impairment test if any evidence suggests that the long assets, such as the long-term equity investment and the investment property, fixed assets, construction in progress and intangible assets, are impaired on the balance sheet date. If impairment test results indicate that the recoverable amounts of the assets are lower than their carrying amounts, the provision for impairment is made based on the differences which are recognized as impairment losses. The recoverable amounts of intangible assets are the higher of their fair values less costs to sell and the present values of the future cash flows expected to be derived from the assets. The provision for assets impairment is calculated and recognized by the individual asset. If it is difficult to estimate the intangible amount of an individual asset, the Company shall estimate the recoverable amount of the asset portfolio that the individual asset belongs to. The asset portfolio is the minimum asset group that can independently generate the cash inflow.

The impairment test is at least conducted at the period-end in respect of the goodwill.

The Company conducts an impairment test for the goodwill. The book value of goodwill arising from business combinations is amortized to relevant asset groups with a reasonable method since the date of acquisition; or amortized to relevant combination of asset groups if it is difficult to be amortized to relevant asset groups. The book value of goodwill is amortized to relevant asset groups or combinations of asset groups according to the proportion of the fair value of such asset groups. Where the fair value cannot be reliably measured, it should be amortized according to proportion of the book value of each asset group or combinations of asset groups.

When making an impairment test on the relevant asset groups or combination of asset groups containing goodwill, if any indication shows that the asset groups or combinations of asset groups related to the goodwill may be impaired, the Company shall first conduct an impairment test on the asset groups or combinations of asset groups not containing goodwill, calculate the recoverable amount and compare it with the relevant book value to recognize the corresponding impairment loss. Then the Company shall conduct an impairment test on the asset groups or combinations of asset groups containing goodwill, and compare the book value of these asset groups or combinations of asset groups (including the book value of the goodwill apportioned thereto) with the recoverable amount. Where the recoverable amount of the relevant asset groups or combinations of asset groups or combinations of asset groups amount of the relevant asset groups or combinations of asset groups is lower than the book value thereof, the Company shall recognize the impairment loss of the goodwill.

The above impairment loss is not reversed in the future accounting period once recognized.

5.19 Employee Compensation

5.19.1 Accounting treatment of short-term remuneration

During the accounting period in which employees provide service to the Company, the short-term remuneration actually incurred is recognized as liabilities and charged to the current profit or loss or the relevant assets cost.

The medical insurance premium, work-related injury insurance premium and the housing provident fund paid by the Company for its employees, together with the labor union expenditures and employee education are used to calculate and determine the relevant employee compensation amount based on the prescribed accrual basis and accrual proportion.

The non-monetary benefits for employees that can be measured reliably are measured at fair value.

5.19.2 Accounting treatment of benefits paid after departure

(1) Defined withdrawal plan

The basic endowment insurance premium and unemployment insurance premium paid by the Company for its employees in accordance with relevant provisions of the local government are recognized as liabilities and charged to the current profit or loss or the relevant assets cost, with the payable amount calculated based on the local prescribed payment base and percentage, during the accounting period in which the employees provide services to the Company.

In addition to the basic endowment insurance, the Company also builds the enterprise annuity payment system (supplementary pension insurance) in accordance with relevant national policies for enterprise annuity system. The Company pays a certain percentage of the total employee compensation to the local social institution, and record the relevant expenditures into the current profit or loss or the relevant assets cost.

(2) Defined benefit plan

The Company attributes the welfare obligation arising from the defined benefit plan to the period during which the employees provide services, in accordance with the formula determined under the estimated accumulated welfare unit method, and records the same into the current profit or loss or the relevant asset cost.

A net liability or net asset in relation to the defined benefit plan is recognized at the present value of the obligation under the defined benefit plan less the deficit or surplus arising out of the fair value of the assets in relation to the defined benefit plan. Where the defined benefit plan has any surplus, the Company will determine the net assets in relation to the defined benefit plan at the lower of the surplus of the defined benefit plan or the asset cap.

The obligations under the defined benefit plan, including the estimated payment obligation within 12 months following the annual report period during which the employees provide service, are discounted to the present value at the market return of the national debt of which the term and currency match those of the obligation under the defined benefit plan on the balance sheet date, or of the high-quality corporate debt in an active market.

The service cost incurred by the defined benefit plan, together with the net interest on the net liability or net asset in relation to the defined benefit plan, are charged to the current profit or loss or the relevant asset cost; the change arising from the re-measurement of the net liability or net asset in relation to the defined benefit plan are recorded into other comprehensive income and are not reversed to the profit or loss in the subsequent accounting period.

The gains or losses on the settlement in respect of the defined benefit plan are recognized at the difference between the present value and the settlement price of the obligation under the defined benefit plan on the settlement date.

5.19.3Accounting treatment of dismissal welfare

Where the Company cannot unilaterally withdraw the dismissal welfare offered in view of the cancellation of the labor relation plan or the layoff proposal, or recognizes the cost or expenses as to the restructuring involving the payment of dismissal welfare (whichever is earlier), the employee compensation arising from the dismissal welfare should be recognized as the liabilities and charged to the current profit or loss.

5.20 Estimated Liabilities

5.20.1 Recognition criteria for estimated liabilities

The Company should recognize an obligation in relation to contingencies as an estimated liability, such as the litigation, debt guarantee, loss-making contract or restructuring, when all the following conditions are satisfied:

(1) that obligation is a present obligation of the Company;

(2) The performance of such obligation is likely to result in outflow of economic benefits from the Company; and the amount of the obligation can be measured reliably.

5.20.2 Measurement of estimated liabilities

The estimated liabilities of the Company are initially measured as the best estimate of expenses required for the performance of relevant present obligations. the risks, uncertainties, time value of money, and other factors relating to the contingencies. If the time value of money is significant, the best estimates shall be determined after discount of relevant future cash outflows. The best estimates shall be treated as follows in different circumstances:

If there is continuous range (or interval) for the necessary expenses, and probabilities of occurrence of all the outcomes within this range are equal, the best estimate shall be determined at the average amount of upper and lower limits within the range.

Given the fact that there is no continuous range (or interval) for the necessary expenses, or probabilities of occurrence of all the outcomes within this range are unequal despite such a range exists, in case that the contingency involves a single item, the best estimate shall be determined at the most likely outcome; if the contingency involves two or more items, the best estimate should be determined according to all the possible outcomes with their relevant probabilities.

When all or part of the expenses necessary for the settlement of an estimated liabilities are expected to be compensated by a third party or other parties, the compensation shall be separately recognized as an asset only when it is virtually certain that the compensation will be received. The amount recognized for the compensation shall not exceed the book value of the estimated liabilities.

5.21 Revenues

5.21.1 Timing for recognition of revenues from sales of goods

Revenues from sales of goods are recognized when the Company has transferred to the buyer the significant risks and rewards of ownership of the goods; the Company retains neither continuous management rights associated with ownership of the goods sold nor effective control over the goods sold; the relevant amount of revenue can be measured reliably; it is highly likely that the economic benefits associated with the transaction will flow into the Company; and the relevant amount of cost incurred or to be incurred can be measured reliably.

5.21.2 Recognition of the revenues from transfer of assets use right

When the economic benefit related to the transaction is probably to flow into the Company and the relevant revenue can be reliably measured, the revenue from transfer of the assets use right is determined as follows: (1) measured based on the length of time for which the Company's monetary funds is used by others and the applicable interest rate; or

(2) amount of royalties revenues, which shall be measured according to the period and method of charging as stipulated in the relevant agreements or contracts.

5.21.3 Measurement principles and methods of completion stage where revenues from rendering of labor are recognized under percentage-of-completion method

If the outcome of transactions can be estimated reliably at the balance sheet date, revenues from rendering of labor services are recognized under the percentage-of-completion method. The percentage of completion is determined by measurement of completed work as a percentage of total estimated costs.

Revenues from rendering of labor services are determined by prices stated in the contracts or agreements, whether already received or to be received, unless such relevant prices are unfair. The current revenue from the rendering of labor services is recognized at the amount of multiplying the total revenue from the rendering of labor services by completion progress and deducting the accumulated revenue from the rendering of labor services recognized in previous accounting periods on the balance sheet date; meanwhile, the current cost of labor services is carried forward by the amount of multiplying the total costs of the rendering of labor services by completion progress and deducting the accumulated revenue from the rendering of labor services is carried forward by the amount of multiplying the total costs of the rendering of labor services by completion progress and deducting the accumulated revenue from the rendering of labor services is carried forward by the amount of multiplying the total costs of the rendering of labor services is carried in previous accounting periods.

When the outcome of transactions involving the rendering of services cannot be estimated reliably, revenues shall be recognized and measured at the balance sheet date as follows:

(1) if the service costs incurred are expected to be fully recoverable, the amounts equal to the labor costs incurred shall be recognized as revenues and the equivalent amounts of labor costs shall be carried forward;
 (2) if the service costs incurred are not expected to be fully recoverable, the labor costs incurred shall be included in the current profit and loss, with no revenue from the rending of labor services not recognized.

5.22 Government Subsidies

5.22.1 Types

Government grants refer to the monetary or non-monetary assets obtained by the Company from the government for free. Government subsidies are classified into government subsidies related to assets and government subsidies related to income.

Government grants relating to purchase or construction of long-term assets, such as fixed assets and intangible assets, etc., shall be recognized as deferred income and amortized over the useful lives of assets constructed or purchased and charged to non-operating income by stage. Government subsidies related to income refer to those other than the government subsidies related to assets.

The Company divides the government subsidies into those related to assets according to the following specific standards: the government subsidies acquired by the Company to acquire, construct or otherwise form the long-term assets;

The Company divides the government subsidies into those related to income according to the following specific standards: the government subsidies other than those related to assets;

If the targets of subsidies are not specified in the government documents, the basis for the Company to determine the classification of the subsidies related to assets or income is: Whether such government subsidies are used to acquire, construct or otherwise form the long-term assets

5.22.2 Accounting treatment

Government subsidies relating to assets shall be recognized as deferred income and amortized over the useful lives of assets constructed or purchased and charged to non-operating income by stage;

If government subsidies related to income are used to compensate the Company's relevant expenses or losses in future periods, such government subsidies should be recognized as deferred income on acquisition and be included into the current non-operating income in the period of recognizing relevant expenses; if government subsidies related to income are used to compensate the enterprise's relevant expenses or losses incurred, such government subsidies are directly included into the current non-operating income on acquisition.

5.23 Deferred Income Tax Assets and Deferred Income Tax Liabilities

Deferred income tax assets shall be recognized for deductible temporary differences to the extent that it is probable that taxable profit will be available against which the deductible temporary differences can be utilized. Deferred income tax assets should be recognized for deductible temporary differences to the extent that it is probable that taxable profit will be available against which the deductible temporary differences can be utilized.

Taxable temporary differences are recognized as deferred income tax liabilities except in special circumstances.

Special circumstances in which deferred income tax assets or deferred income tax liabilities shall not be recognized include: the initial recognition of goodwill; other transactions or events excluding business combinations, which affect neither accounting profits nor the taxable income (or deductible losses) when occurred.

If the Company has the legal right of netting and intends to settle in net amount or to obtain assets and discharge liabilities simultaneously, the income tax assets and income tax liabilities of the Company for the current period shall be presented based on the net amount after offset.

When the Company has the legal rights to balance income tax assets and income tax liabilities for the current period with net settlement, and deferred income tax assets and deferred income tax liabilities are related to the income tax which are imposed on the same taxpaying subject by the same tax collection authority or on different tax paying subjects, but, in each important future period in connection with the reverse of deferred income tax assets and liabilities, the involved tax paying subject intends to balance

income tax assets and liabilities for the current period with net settlement at the time of obtaining assets and discharging liabilities, deferred income tax assets and deferred income tax liabilities shall be presented based on the net amount after offset.

5.24 Lease

5.24.1 Accounting Treatment of operating lease

(1) Lease fees paid by the Company for leased asset shall be amortized at straight-line method over the whole lease period (including rent-free period) and shall be included in the current expenses. Initial direct costs relating to lease transactions incurred by the Company shall be recognized as the current expenses.

If the expense related to the lease which shall be paid by the Company is assumed by the lesser of the asset, then such expenses shall be deducted from total lease fees, and the balances shall be amortized over the lease term s and charged to the current expenses.

The lease fees received for the assets acquired under lease shall be recognized as current expenses over the lease terms (including rent-free periods) on a straight-line basis. The initial direct costs related to lease transactions paid by the Company, included in the current expenses; if a larger amount is to be capitalized, according to confirm the same basis throughout the period of the lease installments related to the lease income is recognized in profit gains.

If expenses relating to leases which should be borne by the lessee of the assets are paid by the Company, they shall be deducted from the total lease income and the balances shall be amortized over the lease terms by the Company.

5.25 Discontinued Operation

Discontinued operation is the component that meets any of the following conditions, is disposed or classified as the held-for-sale one and can be separately distinguished at the time of preparation of financial statements:

(1) such component represents an independent primary business or a major business area;

(2) such component is part of the disposition plan for an independent primary business or a major business area;

(3) such component is a subsidiary acquired for just re-sale.

5.26 Adjustment for Changes in Principal Accounting Policies and Accounting Estimates

5.26.1 Adjustment for changes in accounting policies

There were no changes in the accounting policies in the current reporting period.

5.26.2 Adjustment for changes in principal accounting estimates

There were no changes in the accounting estimates in the current reporting period.

6.1 Main Taxes and Tax Rates Applicable to the Company

| Tax type | Basis of tax assessment | Tax rate |
|---|--|----------------------------------|
| Value-added tax (VAT) | The output tax is calculated based on the revenue from sales of goods and the provision of taxable labor services according to tax law, and value added tax payable should be the balance of the output tax for the period after deducting the deductible input tax for the period. | 6%, 7%, 11%, 13%, 17%, 19% |
| Business tax | Levied based on the taxable income | 5%,7% |
| Enterprise income tax | Levied based on the taxable income | 16%-38%, 25% |
| Urban maintenance and construction tax | Levied based on the actual payment of business tax, VAT and consumption tax | 1%, 7% |
| Education surtax and local education surtax | Levied based on the actual payment of business tax, VAT and consumption tax | 2%, 3% |

Note: The tax rate applicable to ShangGong (Europe) Holding Corp. GmbH, the subsidiary of the Company, and other companies in the scope of consolidation varies in a range from 16% to 38%. The VAT rate is 19%.

7. Notes to the Items of Consolidated Financial Statements

7.1 Cash and Cash Equivalents

| | Ţ | Unit: Yuan, Currency: RMB |
|--|----------------|---------------------------|
| Item | Ending balance | Beginning balance |
| Cash on hand | 2,503,414.31 | 907,883.87 |
| Bank deposit | 597,645,010.44 | 578,453,080.34 |
| Other cash and cash equivalents | 58,865,970.78 | 62,068,277.95 |
| Total | 659,014,395.53 | 641,429,242.16 |
| Including: Total amount abroad deposit | 297,751,103.45 | 341,487,207.49 |

Details of cash and cash equivalents restricted for use due to mortgage, pledge or freezing are as follows:

| Unit. I dail, C | | | | | |
|---------------------------------------|----------------|-------------------|--------|--|--|
| Item | Ending balance | Beginning balance | Remark | | |
| L/C deposit | | 1,519,500.00 | | | |
| Fixed term deposit used for guarantee | 54,797,285.52 | 55,206,282.76 | Note 1 | | |
| Security deposit | 2,907,575.26 | 2,854,570.30 | Note 2 | | |
| Total | 57,704,860.78 | 59,580,353.06 | | | |

Note 1: The deposits are consisting of two items:

(1) The counter guarantee provided by the Company for Commerzbank AG, Shanghai Branch by means of pledge of fixed-term deposit, amounting to RMB 50,000,000.00, to acquire the working capital borrowed from Commerzbank AG, Bielefeld Branch to ShangGong Europe, the subsidiary of the Company.

⁽²⁾The term deposit, amounting to EUR 698,305.00, were pledged by the ShangGong Europe to the FAG Kugelfischer AG, which were equivalent to RMB 4,797,285.52.

Note 2: The deposit, amounting to EUR 423,234.00, were pledged by ShangGong Europe to the Commerzbank, which were equivalent to RMB 2,907,575.26.

7.2 Notes Receivable

7.2.1 Presentation of notes receivable by category

| Item | Ending balance | Beginning balance |
|-----------------------------|----------------|-------------------|
| Bank acceptance bills | 52,949,667.12 | 3,588,868.48 |
| Commercial acceptance bills | 7,087,299.90 | 1,563,300.46 |
| Total | 60,036,967.02 | 5,152,168.94 |

7.2.2 Notes that were endorsed by the Company to other companies but did not come due as at the end of the period: None.

7.2.3 Notes receivable pledged as at the end of period: None.

7.2.4 Notes receivable transferred to accounts receivable due to the issuer's performance failure: None.

7.3 Accounts Receivable

7.3.1 Disclosure of accounts receivable by category

| | Ending balance | | | | | Beginning balance | | | | |

10. Disclose of fair value

The input value used for measuring fair value is divided into three levels:

- The input value of the first level is the unadjusted quotation of similar assets and liabilities that can be obtained in an active market on the measurement date.

- The input value of second level is the directly and indirectly observable input value of the relevant assets or liabilities other than the input value of the first level.

- The input value of the third level is the unobservable input value of the relevant assets or liabilities.

The level of the result of measurement of fair value is the lowest level that the input value which is significantly meaningful for the overall measurement of fair value belongs to.

10.1 The fair value as at june 30, 2015 of assets and liabilities measured at fair value

| | | Fair value as at J | June 30, 2015 | |
|---|---|--|---|----------------|
| Item | Measured at the fair value of the first level | Measured at the fair value of the second level | Measured at the fair value of the third level | Total |
| 1. Measurement at fair value based on going concern | | | | |
| (1) Financial assets measured at fair value through current profit and loss | | | | |
| A. Financial assets held for trading | | | | |
| a. Investment in debt instruments | | | | |
| b. Investments in equity instruments | | | | |
| c. Derivative financial assets | | | | |
| B. Financial assets designated to be measured at fair value through current profit and loss | | | | |
| a. Investment in debt instruments | | | | |
| b. investments in equity instruments | | | | |
| (2) Available-for-sale financial assets | 148,228,312.34 | | | 148,228,312.34 |
| a. Investment in debt instruments | | | | |
| b. Investments in equity instruments | 148,228,312.34 | | | 148,228,312.34 |
| c. Others | | | | |
| (3) Investment property | | | | |
| A. Use right of leased land | | | | |
| B. Leased buildings | | | | |
| C. Land use right held for transfer upon appreciation | | | | |
| Total amount of assets measured at fair value based on going concern | 148,228,312.34 | | | 148,228,312.34 |
| (4) Financial liabilities held for trading | | | | |
| Including: issued bonds held for trading | | | | |
| Derivative financial liabilities | | | | |
| Others | | | | |
| (5) Designated financial liabilities measured at fair value through current profit and loss | | | | |
| Total amount of liabilities measured at fair value based on going concern | | | | |
| 2. Measurement at fair value based on going concern | | | | |
| (1) Assets held for trading | | | | |
| Total amount of assets measured at fair value not based on going concern | | | | |
| Total amount of liabilities measured at fair value not based on going concern | | | | |

10.2 Basis for determination of market price for measurement of fair value of the first level based on going concern and not based on going concern.

The fair value as at June 30, 2015 of available-for-sale financial assets was determined on the basis of the closing price of Shanghai Securities Exchange on June 30, 2015.

| Commerzbank | EUR 555 | 2013/7/30 | 2015/11/29 | No | Note 5 | | | |

Note 1: In 2005, the Company issued, to FAG Kugelfischer GmbH (hereinafter referred to as the "FAG Company"), the letter of guarantee for payment of not more than USD 5.3 million for the housing rented by Dürkopp Adler AG (a holding subsidiary of ShangGong (Europe) Holding Corp. GmbH) as its subsidiary's office in America, the guarantee term is between June 30, 2005 and October 31, 2015; At the same time, ShangGong Europe provided a pledge in cash of EUR 635 thousands with the same term to the FAG Company on June 30, 2005, which was used as collateral for the re-guarantee for the guarantee provided by the FAG Company for the transaction of housing leaseback between a subsidiary of the DA AG in America and UTF Norcross L.L.C..

Note 2: on March 25, 2014, the Company's wholly-owned subsidiary, ShangGong (Europe) Holding Corp. GmbH, applied to the Bielefeld Branch of the Commerzbank for a current fund loan of not more than the equivalent of RMB 58 million in EUR, the Shanghai Branch of the Commerzbank issued a financing guarantee letter for the funds, and the Company issued a corporate letter of guarantee for payment of RMB 70 million as counter guarantee for the above mentioned financing guarantee letter, with a guarantee term of one year.

Note 3: on June 30, 2014, the Company's wholly owned subsidiary, ShangGong (Europe) Holding Corp. GmbH, applied to the Bielefeld Branch of the Commerzbank for a current fund loan of EUR 8 million, the Shanghai Branch of the Commerzbank issued a financing guarantee letter for the funds, and the Company issued an unconditionally irrecoverable corporate letter of guarantee for payment of EUR 8.8 million as counter guarantee for the above mentioned financing guarantee letter, with a guarantee term of one year.

Note 4: on September 17, 2014, the Company's wholly owned subsidiary, ShangGong (Europe) Holding Corp. GmbH, applied to the Bielefeld Branch of the Commerzbank for a short-term credit loan of EUR 12 million, the Shanghai Branch of the Commerzbank issued a financing guarantee letter for the funds, and the Company issued an unconditionally irrecoverable corporate letter of guarantee for payment of EUR7.9 million and provided a pledge in cash of RMB 50 million as counter guarantee for the above mentioned

financing guarantee letter.

Note 5: ShangGong (Europe) Holding Corp. GmbH used 1.2 million shares of Dürkopp Adler AG as collateral for bank guarantee of EUR5.55 million which was issued by the Commerzbank. The term is two years and four months. The purpose is to guarantee that ShangGong (Europe) Holding Corp. GmbH would pay the second-period share purchase installment to the vendor of KSL Keilmann Sondermaschinenbau GmbH.

As of June 30, 2015, there is no flow-out of economic benefits occurred in the Company due to the above guarantee events.

13. Post balance sheet events

13.1 Profit distribution

According to the decision in the 22nd board meeting (7th round) on 28 August, 2015, no dividends will be distributed.

13.2 Notes to other post balance sheet events

At the end of July 2015, ShangGong Europe paid EUR 547,450,000, the second-period share purchase installment, to the seller of KSL GmbH. ShangGong Europe has removed the pledge of 1.2 million shares of DA AG which mortgaged to the Commerzbank as collateral.

14. Other significant events

None.
